

Contents of Volume 2 (1993)

Number 1

V. Straižys and A. Kazlauskas.

General photometric catalogue of stars observed in the Vilnius system. . . . 1

Number 2

V. Straižys, A. Kazlauskas, V. Vansevičius and K. Černis.

Interstellar extinction in the vicinity of the North America and Pelican nebulae. II. 171

K. Černis.

Interstellar extinction in the direction of the open cluster IC 348 and the Per OB2 association. 214

S. Bartašiūtė, Yu. V. Kulagin and N. N. Samus.

Radial velocities of 40 F5–K stars near the North Galactic Pole. 241

M. C. Forbes, R. J. Dodd and D. J. Sullivan.

The Southern Vilnius photometric system. I. Transformation to the standard system. 246

G. Tautvaišienė and R. Lazauskaitė.

Photometric determination of surface gravities for G- and K-type giants of different metallicity. 256

O. Paupers, D. Žaime and I. Eglītis.

Photoelectric photometry of carbon stars in the Vilnius system. 268

A. Alksnis and D. Žaime.

Optical variations of three carbon stars with silicate dust shells. 281

A. Bartkevičius.

Catalogue of metal-deficient F–M stars. Part II. Stars classified photometrically (MDPH Catalogue). 294

A. Sagar and R. Poolamäe.

On deviations from the local thermodynamic equilibrium in stellar atmospheres. 306

V. Straižys, R. L. Kurucz, A. G. D. Philip and G. Valiauga.

New calibration of the Vilnius photometric system. I. Effective temperatures and gravities of B-type stars. 326

Y. A. Averyanikhina, M. Paupere and G. Ozoliņš.

Long-period pulsations of decimeter solar radio emission and evolution of active regions. 348

Number 3/4

J.-E. Solheim.

R. E. Nather – the founder of the WET. 363

R. E. Nather.

Musings on the Whole Earth Telescope. 371

J.-E. Solheim.

The WET from outside Texas. 382

<i>D. O'Donoghue.</i> A third world view of, and approach to, some WET problems.	389
<i>T.M.K. Marar, S. Seetha, B.N. Ashoka.</i> A brief report on WET observations from India.	396
<i>J.C. Clemens.</i> Review of the 1991 WET Workshop.	403
<i>J.C. Clemens.</i> The pulsation properties of the DA white dwarf variables.	407
<i>G. Vauclair.</i> Progress report on the analysis of the WET campaign on RXJ 2117+3412.	435
<i>R.E. Nather.</i> Inside GD 358.	436
<i>S.O. Kepler.</i> Whole Earth Telescope data on G 117-B15A and G 226-29.	444
<i>J.-E. Solheim.</i> Problems in the analysis of the XCOV4 data for AM CVn (HZ 29).	445
<i>J.-E. Solheim.</i> AM CVn – finally solved? Results of XCOV4, March 1990.	459
<i>M. Breger and G. Handler.</i> Extending the WET technique to lower frequencies.	468
<i>E. Meiřtas.</i> Some Central Asian Observatories for the WET.	479
<i>P. Moskalik.</i> Reduction of simultaneous photometric data or how to make a bigger telescope.	485
<i>A. Bruvold.</i> Microsatellites for communication with remote places.	492
<i>J. Krzesinski.</i> Autoguider at Mt. Suhora Observatory.	497
<i>E. Meiřtas.</i> Improvements of the Pancake travelling photometer.	498
<i>J.C. Clemens.</i> Update on extensions to the Texas interface.	501
<i>R. Kalytis, R. Skipitis, A. Karaliūnas and B. Dzindzelėta.</i> Some components of photometric equipment for the WET project.	504
<i>J.C. Clemens.</i> The QED data reduction program.	511
<i>S.O. Kepler.</i> Whole Earth Telescope data analysis.	515
<i>A. Bruvold.</i> A comparison of the <i>prewhite</i> and <i>clean</i> procedures to find the real frequencies.	530
<i>B. Pfeiffer.</i> The several peaks deconvolution method.	538
<i>P.A. Bradley.</i> Methods of asteroseismology for white dwarf stars.	545

P.A. Bradley.

Appendix 1: Variable white dwarf data tables (September 23, 1993 Version). 559

Appendix 2: WET Business Meeting. 568
