

Contents of Volume 5 (1996)

Number 1

<i>V. Bartkevičius, R. Lazauskaitė.</i> Classification of population II stars in the Vilnius photometric system. I. Methods.....	1
<i>V. Straižys, D. L. Crawford, A. G. D. Philip.</i> The Strömvil system: an effective combination of two medium-band photometric systems	83
<i>T. Oja.</i> UBVRI standard stars at northern declinations.....	103
<i>S. J. Adelman, A. G. D. Philip.</i> Some superficially normal stars with Strömgren photometry similar to that of field-horizontal-branch stars	117
<i>V. Straižys, K. Černis, S. Bartašiūtė.</i> Interstellar extinction in the area of the Serpens Cauda molecular cloud	125
<i>R. Janulis.</i> Vilnius photometry of stars in the area of SA 57.....	149
<i>N. G. Peterova, N. A. Pilyeva, B. I. Ryabov.</i> A sunspot-associated source with s-shaped circular polarization.....	157
<i>V. Straižys, A. Kazlauskas, R. P. Boyle, F. J. Vrba, F. Smriglio.</i> Transformation equations between the standard and CCD Vilnius systems. II. The Flagstaff CCD system.....	165
<i>A. Balklavs.</i> Ventspils radiotelescopes: history, parameters, possibilities.....	181

Number 2

PROCEEDINGS OF THE CONFERENCE “PHOTOMETRIC SYSTEMS AND STANDARD STARS” 1995 AUGUST 14–16, MOLĖTAI, LITHUANIA

<i>V. Straižys, A. G. D. Philip.</i> Introduction	195
<i>V. Andruk, S. Bartašiūtė, N. Kharchenko.</i> UBVR and UPXYZVS sequences of standard stars for the MEGA program fields along the main meridian of the Galaxy	197
<i>V. Andruk, N. Kharchenko.</i> Program MEGA: transformation of instrumental magnitudes and color indices to the UBVR system.....	207

<i>A. Bartkevičius.</i> A new version of the catalog of CH and related stars	217
<i>R. P. Boyle, F. J. Vrba, F. Smriglio, A. K. Dasgupta, V. Straizys.</i> CCD observations in the Vilnius photometric system	231
<i>A. Bressan, G. Tautvaišienė.</i> Theoretical isochrones in the observational plane of the Vilnius photometric system	239
<i>D. L. Crawford.</i> Philosophy of standard stars as tools in astronomical photometry	247
<i>D. L. Crawford, E. Craine.</i> A global network of small telescopes as a resource for photometry	255
<i>D. L. Crawford.</i> Light pollution: the problem and the potential solutions	263
<i>R. J. Dodd, M. C. Forbes, D. J. Sullivan, K. Zdanavičius.</i> A southern hemisphere network of the secondary standard stars in the Vilnius photometric system	271
<i>R. J. Dodd, T. Banks, K. Zdanavičius, A. K. Dasgupta, F. Smriglio.</i> Vilnius CCD photometry of NGC 4755 and 47 Tuc	277
<i>M. C. Forbes, R. J. Dodd, D. J. Sullivan.</i> A detailed investigation of atmospheric extinction via Vilnius photometry ...	281
<i>I. N. Glushneva.</i> Synthetic color indices of spectrophotometric standards.....	297
<i>B. Hauck, M. Künzli.</i> Photometric calibrations of the effective temperature	303
<i>R. Janulis, R. Skipitis.</i> A new photometer for the 1.65 telescope	313
<i>A. Kazlauskas.</i> Interstellar extinction in the dark cloud Khavtassi 217 in Cassiopeia	319
<i>N. Kharchenko, E. Schilbach.</i> Program MEGA: stellar counts and galactic models	337
<i>L. N. Knyazeva, A. V. Kharitonov.</i> Intrinsic energy distribution in stellar spectra in the wavelength interval 320–760 nm	357
<i>I. M. Kopylov, D. L. Gorshanov.</i> The photometric part of the space project “Struve”	363
<i>I. M. Kopylov, D. L. Gorshanov.</i> On possible extension of the Vilnius photometric system into the ultraviolet and the near infrared	371
<i>V. Kornilov, A. Mironov, A. Zakharov.</i> The WBVR photometry of bright northern stars	379

<i>V. Kornilov.</i> Determination of atmospheric extinction using a supplementary filter	391
---	-----

Number 3

PROCEEDINGS OF THE CONFERENCE
“PHOTOMETRIC SYSTEMS AND STANDARD STARS”
1995 AUGUST 14–16, MOLĖTAI, LITHUANIA

<i>T. Lejeune, R. Buser.</i> Properties and calibrations of the Washington photometric system from synthetic photometry	399
<i>J.-C. Mermilliod, N. Weidmann, B. Hauck.</i> The Lausanne photometry server on the World Wide Web	413
<i>B. Nicolet.</i> Geneva photometric passbands from the natural system	417
<i>A. G. D. Philip.</i> CCD photometry of globular clusters in the four-color system	425
<i>A. G. D. Philip, R. P. Boyle, V. Straižys.</i> Observations of clusters using the Strömvil system. I. Standard areas	445
<i>F. Smriglio, A. K. Dasgupta, R. P. Boyle.</i> A study of dust cloud parameters by Vilnius photometry	451
<i>V. Straižys.</i> The method of synthetic photometry	459
<i>V. Straižys, E. Hoeg.</i> Photometric systems for future survey satellites	477
<i>J. Sūdžiūis, V. Bobinas, S. Raudeliūnas.</i> The role of the interstellar extinction law and bandwidth effects in multicolor photometry	485
<i>G. Tautvaišienė.</i> Photometric identification of the red horizontal-branch stars in the Galactic field	503
<i>V. M. Tereshchenko.</i> A homogeneous system of secondary spectrophotometric standards of intermediate brightness	517
<i>P. S. The.</i> Application of Strömngren photometry to the study of very young Herbig Ae/Be stars	519
<i>G. Valiauga, V. Vansevičius, V. Straižys.</i> A comparison of the observed and theoretical spectral energy distributions . .	523

<i>V. Vansevičius, A. Bridžius, A. Pučinskas, T. Sasaki.</i> BVRI CCD photometry of the open cluster IC 4996	539
<i>K. Zdanavičius.</i> Atmospheric extinction and its removal in the Vilnius photometric system ...	549
<i>K. Zdanavičius, J. Zdanavičius, A. Kazlauskas.</i> Interstellar extinction in the Camelopardalis dark clouds	563
<i>R. Kalytis, R. Skipitis, V. Luja, D. Ališauskas, E. G. Meištas.</i> Components of photometric instrumentation	579
<i>V. Malyuto, Th. Schmidt-Kaler.</i> On the accuracy of quantitative spectral classification of stars	589

Number 4

<i>G. A. Alekseeva, A. A. Arkharov, V. D. Galkin, E. I. Hagen-Thorn, I. N. Nikanorova, V. V. Novikov, V. B. Novopashenny, V. P. Pakhomov, E. V. Ruban, D. E. Shchegolev.</i> The Pulkovo spectrophotometric catalog of bright stars in the range from 320 to 1080 nm	603
--	-----
