

Contents of Volume 8 (1999)

Number 1

PROCEEDINGS OF THE GAIA WORKSHOP, NOVEMBER 23–27, 1998

<i>P. Mérat, F. Safa, J. P. Camus, O. Pace and M. A. C. Perryman.</i> <i>Gaia</i> : a leading step in the understanding of the galactic structure.	1
<i>E. Høg, C. Fabricius, J. Knude and V. V. Makarov.</i> Sky survey and photometry by the <i>Gaia</i> satellite.	25
<i>W. O’Mullane and L. Lindegren.</i> An object-oriented framework for <i>Gaia</i> data processing.	57
<i>U. Munari.</i> <i>Gaia</i> spectroscopy proposing the 8500–8750 Å region and evaluating the performances.	73
<i>A. Bressan, G. Bertelli, C. Chiosi and A. Vallenari.</i> Crowding in the focal plane of the low-resolution spectrograph for <i>Gaia</i>	97
<i>V. Straižys.</i> Strömvil photometry: peculiar stars and anomalous reddening.	109
<i>U. Munari.</i> A modular and consistent photometric system for <i>Gaia</i>	123
<i>A. Bressan, G. Bertelli, C. Chiosi and A. Vallenari.</i> Simulating the sky for <i>Gaia</i> : magnitudes, colors and reddening-free parameters in the Asiago photometric system.	139
<i>A. Vallenari, G. Bertelli, A. Bressan and C. Chiosi.</i> Simulating the sky for <i>Gaia</i> : the Galaxy model.	147
<i>A. Vallenari, G. Bertelli, A. Bressan and C. Chiosi.</i> Simulating the sky for <i>Gaia</i> : calibration of the Galaxy model.	153

Number 2

PROCEEDINGS OF THE GAIA WORKSHOP, NOVEMBER 23–27, 1998
(Continued)

<i>A. Vallenari, G. Bertelli, A. Bressan and C. Chiosi.</i> <i>Gaia</i> : the galactic central bulge.	159
<i>J. Torra, B. Chen, F. Figueras, C. Jordi and X. Luri.</i> Predicting <i>Gaia</i> observations from a star-count model.	171
<i>C. Turon.</i> Luminosity calibration and distance scale.	181
<i>G. P. Di Benedetto and M. G. Lattanzi.</i> The Cepheid-based distance scale.	191
<i>B. Chen, J.-L. Vergely, D. Egret, J. Torra, F. Figueras and C. Jordi.</i> The spatial resolution of the extinction structure from <i>Gaia</i>	195

<i>G. Gilmore.</i> The star formation history of the Milky Way: methodology and implications.	203
<i>E. Høg, C. Fabricius and V. V. Makarov.</i> The velocity field and 3-D structure of the Universe.	233
<i>M. Crosta, M. G. Lattanzi and A. Spagna.</i> Prospects for astrometric measurements of gravitational waves from stellar sources with <i>Gaia</i>	239
<i>F. D'Antona.</i> <i>Gaia</i> and the evolution of young stars.	253
<i>L. Girardi, G. Bertelli, A. Bressan, C. Chiosi and A. Vallenari.</i> Testing stellar structure and evolution with <i>Gaia</i>	265
<i>G. Bertelli, A. Bressan, C. Chiosi and A. Vallenari.</i> Unraveling the history of star formation in the galactic disk with <i>Gaia</i>	271
<i>D. Barthès and X. Luri.</i> A few remarks on AGB variable stars and the <i>Gaia</i> mission.	285
<i>F. Figueras, E. García-Berro, J. Torra, C. Jordi, X. Luri, S. Torres and B. Chen.</i> <i>Gaia</i> science output: white dwarfs.	291
<i>J. L. Halbwachs and F. Arenou.</i> On derivation of masses of the SB2 components with <i>Gaia</i> astrometry.	301
<i>F. Favata.</i> The impact of high accuracy astrometry on asteroseismology.	309
<i>L. Eyer.</i> First thoughts about variable star analysis.	321

Number 3

<i>A. Bartkevičius and J. Sperauskas.</i> Radial velocities of Population II stars. II.	325
<i>V. Straižys, C. J. Corbally and V. Laugalys.</i> Interstellar extinction law in the vicinity of the North America and Pelican nebulae.	355
<i>S. J. Adelman.</i> Variability of the uvby light curves of the magnetic CP star 108 Aquarii.	369
<i>B. Elsner, U. Bastian, R. Liubertas and R. Scholz.</i> Stellar classification from simulated DIVA spectra. I. Solar metallicity stars.	385
<i>V. Mioc and M. Stavinschi.</i> Nonlinear stability of equilibria of the Manev-type two-body problem.	411
<i>A. A. Vakhidov.</i> Asteroid orbits near the 4:1 resonance with Jupiter.	425

Number 4

<i>S. Bartašiūtė.</i> Photoelectric Vilnius photometry of stars in four Mega proper-motion fields near the North Galactic Pole. I. Catalog of observations.	443
--	-----

<i>S. Bartašiūtė, O. V. Ezhkova and R. Lazauskaitė.</i>	
Photoelectric Vilnius photometry of Hipparcos turn-off region stars.	465
<i>T. Kipper.</i>	
Sakurai's object and its dust shell.	483
<i>V. Straižys.</i>	
Synthetic photometry experiments in the vicinity of the Paschen jump. II.	491
<i>C. de la Fuente Marcos and P. Barge.</i>	
Particle confinement in a non-axisymmetric protoplanetary nebula	499
<i>V. Straižys.</i>	
Photometric systems and stellar parameters.	505
<i>B. Milvang-Jensen and I. Jørgensen.</i>	
Galaxy surface photometry.	535
<i>V. A. Hagen-Thorn and S. G. Marchenko.</i>	
Photometry and polarimetry of active galactic nuclei.	575
<i>R. F. G. Wyse.</i>	
Stellar populations	593
