

## Contents of Volume 9 (2000)

### Number 1

PROCEEDINGS OF THE FIFTH WET WORKSHOP, AUGUST 15–20,  
1999

<i>E. G. Meištas and G. Vauclair.</i> Introduction. . . . .	1
<i>S. D. Kawaler.</i> Preface. . . . .	2
<i>S. J. Kleinman and D. O'Donoghue.</i> The state and future of WET as an instrument. . . . .	3
<i>M. S. O'Brien.</i> Asteroseismological constraints on the extent and cause of the pre-white dwarf instability strip. . . . .	13
<i>M. H. Montgomery and D. E. Winget.</i> The effect of $^3\text{He}$ diffusion on the pulsational spectra of DBV models. . . . .	23
<i>F. Vuille.</i> Nonlinear behavior of the pulsating white dwarf GD 358. . . . .	33
<i>J. L. Provencal and H. L. Shipman.</i> The temperature of the hot DB GD190. . . . .	43
<i>S. Seetha, T. M. K. Marar, R. E. Nather et al.</i> The location of the driving region in white dwarf pulsators. . . . .	49
<i>S. O. Kepler, E. L. Robinson, D. Koester et al.</i> Mode identification of pulsating white dwarfs using the HST. . . . .	59
<i>J. Ising and D. Koester.</i> Light curves and time resolved spectroscopy of ZZ Ceti stars. . . . .	69
<i>D. J. Sullivan and T. Sullivan.</i> Frequency Stabilities of two Pulsating White Dwarfs. . . . .	81
<i>A. Kanaan, A. Nitta-Kleinman, D. E. Winget et al.</i> BPM 37093: preliminary results from XCOV 16 and XCOV 17. . . . .	87
<i>A. Nitta, A. Kanaan, S. O. Kepler et al.</i> Mode identification of BPM 37093 with the HST. . . . .	97
<i>S. Dreizler, D. Koester and U. Heber.</i> Time-resolved spectroscopy of BPM 37093 and PG 1336-018. . . . .	113
<i>D. Koester and N. F. Allard.</i> The ZZ Ceti instability strip revisited. . . . .	119
<i>S. O. Kepler, A. F. M. da Costa, O. Giovannini, and D. Koester.</i> The $\text{ML1}/\alpha = 2$ instability strip of ZZ Ceti stars. . . . .	125
<i>G. Vauclair, N. Dolez, J.-N. Fu et al.</i> PG1541+650: A new ZZ Ceti white dwarf. . . . .	133
<i>Y. Wu.</i> Origin of the combination frequencies in the pulsation spectra of white dwarfs. . . . .	141

<i>M. Breger.</i>	
Asteroseismology of Delta Scuti stars. . . . .	149
<i>R. Zechner.</i>	
Preliminary Delta Scuti star catalog. . . . .	165
<i>U. Heber, I. N. Reid and K. Werner.</i>	
Spectral analysis of four multi-mode pulsating sdB stars. . . . .	171

## Number 2

### PROCEEDINGS OF THE FIFTH WET WORKSHOP, AUGUST 15–20, 1999 (Continued)

<i>M. D. Reed, D. Kilkenny, S. D. Kawaler et al.</i>	
Preliminary results from XCOV 17: PG 1336-018. . . . .	183
<i>S. Zola.</i>	
Reflection effect in PG 1336-018 . . . . .	197
.	
<i>R. Silvotti, J. M. Gonzalez Perez, J.-E. Solheim et al.</i>	
PG 1618+563: a new bright pulsating sdB star. . . . .	205
<i>M. A. Wood, J. C. Simpson, S. D. Kawaler et al.</i>	
WET observations and smoothed particle simulations of DQ Herculis. . . . .	211
<i>D. J. Sullivan, J. Pritchard, M. L. Reid and T. Sullivan.</i>	
CCD time-series observations of the DAV cataclysmic variable GW Librae. . . . .	223
<i>L. van Zyl, B. Warner, D. O'Donoghue et al.</i>	
GW Librae: an accreting variable white dwarf. . . . .	231
<i>R. J. Slevinsky, D. Stys, S. West et al.</i>	
An IUE archival study of the white dwarf temperature variation in the dwarf nova WZ Sagittae. . . . .	247
<i>D. W. Kurtz and P. Martinez.</i>	
Observing roAp stars with WET: a primer. . . . .	253

## Number 3

### PROCEEDINGS OF THE FIFTH WET WORKSHOP, AUGUST 15–20, 1999 (Continued)

<i>R. Medupe.</i>	
A proposal for multicolor WET photometric campaign on roAp stars. . . . .	355
<i>A. Stankov.</i>	
Preliminary new results on $\beta$ Cephei stars in NGC 4755. . . . .	369
<i>D. O'Donoghue, A. Kanaan, S. J. Kleinman et al.</i>	
CCDs and WET: where are we and where are we going. . . . .	375
<i>A. Kanaan, D. O'Donoghue, S. J. Kleinman et al.</i>	
The amplitude differences between CCD and PMT measurements. . . . .	387
<i>S. Schuh, S. Dreizler, J. L. Deetjen et al.</i>	
CCD photometry of variable subdwarfs and white dwarfs at Calar Alto Ob- servatory. . . . .	395

<i>E. M. Leibowitz, P. Ibbetson and E. O. Ofek.</i> Wise Observatory system of fast CCD photometry. . . . .	403
<i>R. Østensen and J.-E. Solheim.</i> Results from the Tromsø CCD photometry project. . . . .	411
<i>D. J. Sullivan.</i> The New Zealand WET three-channel photometer. . . . .	425
<i>D. Ališauskas, R. Janulis, R. Kalytis et al.</i> The new series of the Vilnius-design classical WET photometer. . . . .	433
<i>E. G. Meištas.</i> One more modernization of the Pancake photometer. . . . .	447
<i>J. E. S. Costa and S. O. Kepler.</i> Determination of the uncertainties in frequency, amplitude and phase from Monte Carlo simulations. . . . .	451
<i>S. Roques, A. Schwarzenberg-Czerny and N. Dolez.</i> Parametric spectral analysis applied to gapped time-series of variable stars. . . . .	463
<i>T. S. Metcalfe and R. E. Nather.</i> The asteroseismology metacomputer. . . . .	479
<i>P. A. Bradley.</i> White dwarf data tables. . . . .	485

#### Number 4

PROCEEDINGS OF THE CONFERENCE “ASTRONOMICAL DATA  
ACQUISITION, PROCESSING AND STORAGE: MODERN FACILITIES”,  
MAY 29 – JUNE 3, 2000

<i>O. B. Duzhnevskaya and F. Pasian.</i> Foreword. . . . .	507
<i>O. B. Duzhnevskaya.</i> Opening address. . . . .	509
<i>F. Pasian, M. Bersanelli and N. Mandolesi.</i> Data management for the low frequency instrument of the ESA Planck mission. . . . .	511
<i>T. Movsessian, J.-L. Gach, J. Boulesteix and F. Zhamkotsian.</i> The integral field spectrograph for the 2.6 m telescope of the Byurakan Observatory. . . . .	518
<i>C. Vuerli, F. Pasian, M. Pucillo and R. Smareglia.</i> The high-level control and data handling system of the Galileo telescope. . . . .	523
<i>V. Vitkovskij, V. Chernenkov, A. Ivanov, V. Gurin et al.</i> The remote access system for the largest Russian telescopes BTA and RATAN-600. . . . .	527
<i>I. L. Andronov.</i> Time-series analysis of irregularly spaced data. . . . .	532
<i>R. Smareglia, F. Pasian, M. Nonino, E. Giallongo et al.</i> On-line data handling, processing and archiving for the twin wide-field imagers of the LBT. . . . .	537
<i>E. Bratsolis, F. Maragoudaki, I. Bellas-Velidis et al.</i> Automatic extraction and classification of low-dispersion objective-prism stellar spectra. . . . .	541

<i>V. Marsakova and I. Andronov.</i> Processing of amateur observations of Mira-type stars from large databases: problems and results. . . . .	545
<i>V. G. Promislov.</i> Evolutionary optimization algorithm with learned behavior for image restoration. . . . .	550
<i>Yu. Protsyuk.</i> The universal software complex for the processing of astrometric CCD observations. . . . .	554
<i>M. Wenger, F. Genova, F. Bonnarel, P. Dubois, D. Egret et al.</i> The CDS information hub: interoperability with bibliography and archives. . . . .	557
<i>H. R. Dickel.</i> Designations of astronomical sources and the IAU task group on designa- tions. . . . .	564
<i>V. Avedisova.</i> Catalogue of galactic star-forming regions. Observational data. . . . .	569
<i>M. K. Tsvetkov, M. Stavinschi, K. P. Tsvetkova et al.</i> Wide-field plate database: the Bucharest plate catalogues. . . . .	573
<i>V. Vitkovskij, O. Zhelenkova, N. Kalinina et al.</i> The project of distributed information system OASIS. . . . .	578
<i>N. N. Samus, E. V. Kazarovets and O. V. Durlevich.</i> General catalogue of variable stars: modern trends. . . . .	583
<i>F. G. Kupka, T. A. Ryabchikova, N. E. Piskunov et al.</i> VALD-2 – the new Vienna atomic line database. . . . .	590
<i>N. Milovanović, L. C. Popović and M. S. Dimitrijević.</i> BELDATA – the database of Belgrade Astronomical Observatory. . . . .	595
<i>V. N. Ishkov and V. G. Petrov.</i> Database of Solar geoeffective phenomena and their responses in Earth’s space environment system. . . . .	599
<i>O. V. Verkhodanov, S. A. Trushkin, N. V. Chernenkov and H. Andernach.</i> CATS – the largest radio astronomical database: extragalactic facilities. . . . .	604
<i>S. A. Trushkin, O. V. Verkhodanov, N. V. Chernenkov and H. Andernach.</i> CATS – the largest radio astronomical database: Galactic facilities. . . . .	608
<i>M. K. Tsvetkov, M. Stavinschi, K. P. Tsvetkova, K. Y. Stavrev et al.</i> The wide-field plate database: towards a European plate center. . . . .	613
<i>O. B. Dluzhnevskaya, O. Yu. Malkov and F. Pasian.</i> MASCOT: a multi-wavelength all-sky catalogue for observations with ground- and space-based telescopes. . . . .	618
<i>M. Wenger, F. Genova, F. Bonnarel, P. Dubois et al.</i> CDS tools for cross-identification. . . . .	625
<i>O. Malkov.</i> MASCOT: INASAN experience and contributions. . . . .	627
<i>N. N. Samus, E. V. Kazarovets, O. V. Durlevich, S. V. Antipin et al.</i> Positions of variable stars for MASCOT. . . . .	629
<i>A. E. Avramenko, Yu. P. Ilyasov and V. A. Potapov.</i> Identification of pulsars among the sky survey objects. . . . .	631
<i>O. P. Bykov.</i> Pulkovo contribution to the MASCOT. . . . .	633

<i>N. Kharchenko and E. Kilpio.</i>	
Cross-identification of Miras with high-accuracy astrometric catalogues. . . . .	635
<i>F. Pasian.</i>	
WWW access to the MASCOT databases. . . . .	637
<i>A. E. Avramenko, Yu. P. Ilyasov, O. V. Doroshenko et al.</i>	
4D pulsar astrometry data processing. . . . .	639
<i>V. V. Bochkov.</i>	
Database of spectral observations with tools for their analysis. . . . .	642
<i>H. Hensberge and M. David.</i>	
On the optimization of flux estimates. . . . .	644
<i>N. Kharchenko and E. Kilpio.</i>	
The compiled catalogue of kinematic characteristics of Mira-type stars. . . . .	646
<i>D. O. Kudryavtsev.</i>	
Reduction of Echelle and long-slit Zeeman spectra in Midas. . . . .	649
<i>T. Movsessian, J. Boulesteix, J.-L. Gach, S. Zaratsian et al.</i>	
Spectral camera for 2.6 m telescope of the Byurakan Observatory. . . . .	652
<i>I. F. Nikulin.</i>	
A CCD spectroheliograph. . . . .	654
<i>L. C. Popović, N. Milovanović and M. S. Dimitrijević.</i>	
The importance of electron-impact broadening in hot star atmospheres: the case of Zr II and Zr III lines. . . . .	656
<i>O. P. Pylyskaya and D. S. Wiebe.</i>	
On current distance scales for open clusters. . . . .	658
<i>L. A. Sat.</i>	
Concepts and structure for a “digital library of an astronomer”. . . . .	660
<i>D. Tankosić, L. C. Popović and M. S. Dimitrijević.</i>	
Stark broadening of heavy element spectral lines in hot stars: Au II, Co II, Ti II and Co III. . . . .	662
<i>A. S. Trushkina and A. G. Gubanov.</i>	
The Java-applet for radio spectra analysis. . . . .	664
<i>O. V. Verkhodanov, A. I. Kopylov, O. P. Zhelenkova et al.</i>	
Creation of a database of spectral energy distributions of radio galaxies. . . . .	668
<i>A. Vid'machenko.</i>	
Information-measuring and registering system of an astronomical polarimeter. . . . .	670
<i>F. Pasian.</i>	
Astronomical data acquisition, processing and storage: modern facilities – concluding remarks. . . . .	672
