

## Contents of Volume 11 (2002)

### Number 1

|  |     |
|--|-----|
| <i>W. Wegner.</i><br>Atlas of interstellar extinction curves of OB stars covering the whole<br>available wavelength range. . . . .                     | 1   |
| <i>J. Zdanavičius and K. Zdanavičius.</i><br>Photometry and classification of stars along the Camelopardalis and<br>Perseus border. . . . .            | 75  |
| <i>A. Uppgren, J. Sperauskas and R. P. Boyle.</i><br>Space motions of low-mass stars. . . . .  | 91  |
| <i>R. L. Kurucz.</i><br>A few things we do not know about the Sun and F-G stars. . . . .   | 101 |
| <i>A. Del Popolo and M. Gambera.</i><br>High velocity clumps and cluster of galaxies evolution. . . . .  | 113 |
| <i>V. Straižys and R. Lazauskaitė.</i><br>Star classification possibilities with broad-band photometric systems.<br>II. The Gaia UBVRI system. . . . . | 135 |

### Number 2

|  |     |
|--|-----|
| <i>A. Bartkevičius and A. Gudas.</i><br>Kinematics of Hipparcos visual binaries. II. Stars with ground-based<br>orbital solutions. . . . .                                     | 153 |
| <i>V. Laugalys and V. Straižys.</i><br>CCD photometry and classification of stars in the North America and<br>Pelican nebulae region. I. Molėtai photometry. . . . .           | 205 |
| <i>A. Kazlauskas, K. Černis, V. Laugalys and V. Straižys.</i><br>Photometric investigation of the MBM 12 molecular cloud area in Aries<br>I. Photoelectric photometry. . . . . | 219 |
| <i>V. Straižys, K. Černis, A. Kazlauskas and V. Laugalys.</i><br>Photometric investigation of the MBM 12 molecular cloud area in Aries<br>II. Cloud distance. . . . .          | 231 |
| <i>T. Kipper.</i><br>Hydrogen-deficient carbon star HM Lib. . . . .  | 249 |
| <i>V. Straižys, C. J. Corbally, A. Kazlauskas and K. Černis.</i><br>A comparison of photometric and spectral classification of some stars<br>in Perseus. . . . .               | 261 |
| <i>J. Krempėć-Krygier, B. Krygier and J. Krywult.</i><br>Binary merging clusters in the Hercules galaxy supercluster. . . . .  | 269 |

### Number 3

|   |     |
|---|-----|
| <i>G. A. Tammann and B. Reindl.</i><br>GAIA and the extragalactic distance scale. . . . . | 297 |
|---|-----|

|   |     |
|---|-----|
| <i>V. Straizys, K. Černis and S. Bartašiūtė.</i><br>Photometric investigation of the Galaxy in the direction of Serpens<br>Cauda. Photoelectric photometry. . . . . | 321 |
| <i>V. Straizys, R. Lazauskaitė and G. Valiauga.</i><br>Kurucz model energy distributions: a comparison with real stars.<br>II. Metal-deficient stars. . . . .       | 341 |
| <i>D. Semionov.</i><br>Catalog of multicolor profiles of galaxies. . . . .  | 367 |
| <i>A. Fritz.</i><br>The distance to the Leo I group using I-band surface brightness<br>fluctuations. . . . .  | 385 |
| <i>V. Mioc.</i><br>Symmetries in the Schwarzschild problem. . . . .   | 401 |

#### Number 4

|  |     |
|--|-----|
| <i>V. Straizys, S. Bartašiūtė and Černis.</i><br>Photometric investigation of the Galaxy in the direction of Serpens<br>Cauda. A catalog of extinctions and distances. . . . .   | 417 |
| <i>J. Zdanavičius and K. Zdanavičius.</i><br>Interstellar extinction along the Camelopardalis and Perseus border. . . . .  | 441 |
| <i>J. Sperauskas, Z. Aslan, S. Bartašiūtė and R. P. Boyle.</i><br>Radial velocities of stars in the Mega proper motion fields at high<br>Galactic latitudes. . . . .   | 465 |
| <i>S. J. Adelman.</i><br>On the periods of the magnetic CP stars. . . . .  | 475 |
| <i>A. Alksnis, V. M. Larionov, L. V. Larionova and V. I. Shenavrin.</i><br>Multicolor variability of the carbon star DY Per. . . . .   | 487 |
| <i>A. A. Berezhnoy, E. Bervalds, O. B. Khavroshkin, A. V. Kovalenko,<br/>G. Ozolins, M. Paupere, G. T. Smirnov and V. V. Tsyplakov.</i><br>Radio observations of the Moon during activity periods of the Leonid<br>and Lyrid meteor streams. . . . . | 507 |
| <i>K. Balachandra Kumar, V. Raja, K. Nagarajan, S. P. Bagare and<br/>N. Rajamanickam.</i><br>Transition probability parameters for certain band systems of<br>the astrophysical molecule PO. . . . .   | 529 |
| <i>D. Semionov and V. Vansevicius.</i><br>Radiative transfer problem in dusty galaxies: ray-tracing vs. Monte-Carlo. . . . .   | 537 |
