Contents

T. Kipper, V. G. Klochkova. Peculiarities and variations in the optical spectrum of the RV Tauri-type star R Sct	77
T. Kipper. On the spectrum of extremely metal-poor star HD 52961	101
E. Kundra, L. Hric, R. Gális. Pulsation of IU Per from the ground-based and 'INTEGRAL' photometry	111
X.-F. Deng, F. Zhang. Further investigation of the effect of galaxy interactions on star formation	123
X.-F. Deng, C.-H. Luo, Y. Xin, P. Wu. Environmental dependence of different colors for the apparent magnitude-limited Main galaxy sample of the SDSS DR7	133
A. Sapar, R. Poolamäe, L. Sapar. A new high-precision correction method of temperature distribution in model stellar atmospheres	145
A. Sapar, R. Poolamäe, L. Sapar. New methods in modeling of hot stellar atmospheres	161

VILNIUS, LITHUANIA
