
BALTIC ASTRONOMY

An international journal

Volume 23
Number 3/4
2014

Contents

- E. E. Zotos. How does the mass transport in disk galaxy models influence the character of orbits? 151
- L. Sapar, A. Sapar, R. Poolamäe, A. Aret. Diffusional separation of calcium isotopes in chemically peculiar stellar atmospheres 171
- A. del Popolo. Improvements in the spherical collapse model and dark energy cosmologies 189
- P. de Meulenaer, D. Narbutis, T. Mineikis, V. Vansevicius. Stochasticity in star clusters: reduced random sampling method 199
- T. Mineikis, V. Vansevicius. Stochastic 2-D galaxy disk evolution models. The galaxy M33 209
- T. Mineikis, V. Vansevicius. Models of late-type disk galaxies: 1-D versus 2-D 221
- K. Černis, I. Włodarczyk, J. Zdanavičius. Orbits of asteroids discovered at the Molėtai Observatory in 2000–2004 231

SELECTED PAPERS OF THE CONFERENCE
« MODERN STELLAR ASTRONOMY – 2014 »
2014 May 28–30, Rostov-on-Don, Russia

- N. A. Lipaeva, V. N. Sementsov, O. Yu. Malkov. Catalogue of bright IDS stars with extensive cross-identifications 245
- O. Maryeva. The half-century history of studies of Romano's star 248
- E. A. Avvakumova, O. Yu. Malkov, A. A. Popov, A. Yu. Kniazev. Observations of two unusual eclipsing binaries, FN Cam and AG Vir 255
- D. A. Khamidullina, M. E. Sharina, V. V. Shimansky, E. Davoust. Medium resolution spectroscopy and chemical composition of Galactic globular clusters 260

O. Yu. Malkov. On the mass distribution of stellar-mass black holes	267
L. P. Ossipkov On cluster rotation in the galactic tidal field	272
O. Silchenko, M. Ilyina, I. Katkov Outer rings in early-type galaxies: from Vorontsov-Velyaminov to present	279
A. V. Mironov, A. I. Zakharov, V. G. Moshkalev, O. Yu. Malkov, E. Yu. Kilpio. On the construction of a new 3D atlas of stellar spectral energy distributions	286
L. P. Ossipkov. Some self-consistent models of infinitely thin stellar disks with an elliptical velocity distribution	291
Contents of Volume 23	297
Instructions to authors	299
