

BALTIC ASTRONOMY

An international journal

Volume 24

Number 2

2015

Contents

SELECTED PAPERS OF THE CONFERENCE
« MODERN STELLAR ASTRONOMY – 2014 »
2014 May 28–30, Rostov-on-Don, Russia (continued)

- M. Butenko, A. Khoperskov, S. Khoperskov. Galactic spiral pattern beyond the optical size induced by the triaxial dark halo 119
- L. M. Chechin. High resolution gravitational lens model126
- D. Chulkov, M. Prokhorov, O. Malkov, S. Sichevskij, N. Krussanova, A. Mironov, A. Zakharov, A. Kniazev. Detection of unresolved binaries with multicolor photometry137
- A. Davydenko. On the formation of tails in the Galactic tidal field144
- A. O. Gromov, I. I. Nikiforov, L. P. Ossipkov. On the possibility of applying the quasi-isothermal Stäckel’s model to our Galaxy150
- A. A. Isaeva, D. A. Kovaleva, O. Yu. Malkov. Visual binaries: cross-matching and compiling of a comprehensive list 157
- P. B. Ivanov, J. C. B. Papaloizou, S.-J. Paardekooper, A. G. Polnarev. The evolution of a supermassive retrograde binary embedded in an accretion disk 166
- B. P. Kondratyev, N. G. Trubitsina. On equilibrium figures of particle clouds around the Sun and stars176
- D. A. Kovaleva, O. Yu. Malkov, P. V. Kaygorodov, A. V. Karchevsky, N. N. Samus. BSDB: a new consistent designation scheme for identifying objects in binary and multiple stars185
- E. A. Mikhailov, I. I. Modyaev. Star formation and Galaxy dynamo equations with random coefficients 194
- M. V. Ryabova, Yu. A. Shchekinov. Destruction of globular clusters in the Galactic gravitational field201
- L. V. Smirnova. Stochasticity of Galactic orbits of star clusters 209
- E. O. Vasiliev, A. V. Moiseev, Yu. A. Shchekinov. Velocity dispersion of ionized gas and multiple supernova explosions213
