# BALTIC ASTRONOMY

An international journal

Volume 25  
Number 2  
2016

## Contents

---

- E. E. Zotos. Revealing the network of periodic orbits in galaxy models with a prolate or an oblate dark matter halo component ..... 119
- E. E. Zotos. Classifying orbits of low and high energy stars in axisymmetric disk galaxies ..... 139
- Xin-Fa Deng, Xiao-Ping Qi, Ping Wu et al. Luminosity-environment relation in the LOWZ sample of the SDSS-III ..... 153
- K. Černis, I. Włodarczyk, J. Zdanavičius. Observational data and orbits of the asteroids discovered at the Molėtai Observatory in 2005–2007 . 165
- I. Włodarczyk. The potentially hazardous asteroid 2000 SG344 ..... 179
- K. Černis, R. P. Boyle, I. Włodarczyk. Discovery, observational data and the orbit of the Transneptunian object (420356) Praamžius ..... 189
- A. Del Popolo, Xi-Guo Lee. The surface density of haloes ..... 195
- A. Del Popolo, Xi-Guo Lee. Improvements on a unified dark matter model ..... 211
- B. I. Ryabov, K. Shibasaki. Depressed emission between magnetic arcades near a sunspot ..... 225
- G. Donskykh. The study of radio flux density variations of the quasar OJ287 by the wavelet and the singular spectrum methods ..... 237
