Contents

SELECTED PAPERS OF THE CONFERENCE
« MODERN STELLAR ASTRONOMY – 2016 »
2016 June 8–10, Kislovodsk, Russia

- B. P. Kondratyev, E. N. Kireeva. Phase-space model of a collisionless stellar cylinder embedded in a rotating halo 247
- A. Mylläri, V. Orlov, A. Chernin, A. Martynova, T. Mylläri. Symbotic dynamics, mixing and entropy in the three-body problem 254
- V. V. Bobylev, A. T. Bajkova. Estimating the vertical disk scale height using young galactic objects 261
- A. F. Seleznev. Kernel density estimation in the study of star clusters .. 267
- S. A. Shomshekova, A. V. Kusakin, I. V. Reva. Photometric study of the Seyfert galaxy NGC 4151 275
- G. Dryomova, V. Dryomov, A. Tutukov. Ejection of stars with relativistic velocities 280
- E. V. Polyachenko. Swing amplification and global modes reciprocity in models with cusps 288
- A. D. Chernin. Gravity-antigravity interplay in the local galaxy flows .. 296
- S. Yu. Gorda, A. M. Sobolev, A. P. Bisyarina, P. E. Zakharova, E. D. Kuznetsov. Spectroscopic studies of early-type stars with the Kourovka 1.2 m telescope 300
- M. Xiang-Gruess, P. B. Ivanov, J. C. B. Papaloizou. A quasi-stationary twisted disk formed as a result of a tidal disruption event 304
- O. V. Kiyeva. Orbits of wide binaries – new possibilities 310

A. A. Tatarnikova, M. A. Burlak, D. V. Popolitova, T. N. Tarasova, A. M. Tatarnikov. Details of the classification of symbiotic stars: the case of the symbiotic nova AG Peg	317
E. O. Vasiliev, S. A. Khoperskov, A. V. Khoperskov. Molecular clouds and star formation rate in disk galaxies	324
I. P. Kostiuk, O. K. Sil'chenko. Outer rings in early-type disk galaxies: star formation rate	331
B. P. Kondratyev, N. G. Trubitsyna. The tidal potential of a homogeneous torus with an elliptical section of the sleeve	338
